EXAMINER'S ACTION

Serial No. 565,154

-2-

Art Unit 339

The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claim 21 is rejected under 35 U.S.C. § 102(e) as being anticipated by Spears. Spears discloses a method as claimed by applicant.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claim 22 is rejected under 35 U.S.C. § 103 as being unpatentable over Spears. It would have been an obvious engineering design choice to use such a temperature range and

time duration to insure tissue destruction.

Claims 23 and 24 are rejected under 35 U.S.C. § 103 as being unpatentable over Spears in view of Doering. Doering teaches the use of treatment heat in the uterus. It would have been obvious in view of Doering to use the method of Spears in the uterus for treatment thereat. Claim 24 is rejected for the same reasons as claim 22 above.

The remaining art is cited to show after heat treatment methods.
